

Visitation Is Back

We're extremely happy to share that thanks to our rising vaccination rates, fully vaccinated residents can enjoy more community activities and expanded visitation, subject to applicable guidelines as they evolve, including:

- Welcoming visits from fully vaccinated loved ones
- Participating in a variety of activities and group dining
- Spending time in community common areas and socializing with other residents who are fully vaccinated
- Enjoying day trips outside of the community without having to be on strict quarantine upon their return
- In addition, many of our communities are now conducting in-person tours and evolving our move-in protocols for new fully vaccinated residents
- We are still conducting our virtual visitations for those needing that special time.
- We continue to follow the core principles of Covid-19 Infection prevention... screening, hand hygiene, masking (double masking is preferred), social distancing, disinfecting, PPE use, covid testing.
- Visiting guidelines... can not visit in shared rooms, visitors should go from front door to resident and no where else, two visitors per room, larger groups of visitors can visit outside or in a dining area outside of meal times. Outdoor visits are preferred please.

We have taken the important step of introducing vaccinations for all community team members. To continue protecting the safety and health of our communities, we expect all community team members to be fully vaccinated against COVID-19.

As we look ahead into the bright future, we will continue to update you on our vaccination progress and what life is like at our healthcare community.

Additional questions please call --- **515 – 386 – 4107** -- to learn more. We are happy to be your healthcare expert and provider.

Our goal is resident and staff safety! Please do your part. Most importantly... GET VACCINATED!

Thank you,

Michelle Klocke
